List of Current Papers

published for

THE AERONAUTICAL RESEARCH COUNCIL
(Numbers 851-900)

and placed on sale by H.M. Stationery Office

C.P. No.	Council No.	Title	Author(s)
851	26 839	Mercury programmes for lifting surface theory calculations on wings oscillating in supersonic flow. (November, 1964)	Harris, G.Z.
852	25 835	The motion of helicopter blades at low rotor speeds in high winds. (September, 1963)	Willmer, M.A.P.
853	27 306	Boundary layer separation in a centrebody nozzle with parallel shroud. (September, 1965)	Herbert, M.V. and Herd, R.J.
854	25 288	A note on the deck landing velocities of helicopters. (April, 1963)	Willmer, M.A.P.
855	25 889	The theoretical stability derivatives for a symmetrically tapered wing of aspect-ratio 3 at supersonic speeds. (April, 1964)	Lehrian, Doris E.
856	26 074	A technique for the wind tunnel simulation of store release at high speeds. (May, 1964)	Beecham, L.J.
857	26 180	Laminar boundary layers with uniform fluid properties. Similar solutions to the velocity equations involving mass transfer. (September, 1964)	Evans, H.L.
858	26 358	The calculation of the shape of an electric arc discharge rotating in an angular gap under the influence of a non-uniform longitudinal applied magnetic field. (June, 1964)	Shaw, J.M.

C.P. No.	Council No.	Title	Author(s)
859	26 390	Wind tunnel experiments on a lifting jet in a bluff body with and without wings. (July, 1964)	Trebble, W.J.G.
860	26 537	A method for correcting measurements of the heat transfer factor through the skin of a wind tunnel model. (May, 1964)	Piggott, B.A.M.
861	26 623	Further tests on a three-stage turbine of low reaction to examine the effects of reduced rotor pitch and improved sealing. (August, 1964)	Johnston, I.H. and Dransfield, D.C.
862	26 632	A note on skin-friction laws for the incompressible turbulent boundary layer. (December, 1964)	Nash, J.F.
863	26 677	Two-dimensional normal fences on a flat plate. (February, 1965)	Barnes, C.S.
864	26 748	Approximate formulae for the lift and drag of wedge aerofoil sections at high supersonic speeds. (March, 1965)	Squire, L.C.
865	27 864	A simple flexible supersonic wind tunnel nozzle for the rapid and accurate variation of flow Mach number. (December, 1965)	Pierce, D.
866	26 912	Tests on an engine installation for a slender gothic wing at $M = 1.82$. (August, 1964)	Griffiths, R.T.
867	26 795	Normal accelerations measured in the cockpit and at the C.G. of a jet transport aeroplane during flight through rough air. (December, 1964)	Burnham, J.
868	26 961	Turbulent boundary layer theory and its application to blade profile design. (March, 1965)	Smith, D.J.L.

C.P. No.	Council No.	Title	Author(s)
869	27 014	Low-speed wind-tunnel measurements of damping in yaw ($n\psi$) on an A.R.9 jet-flap complete model. (February, 1965)	Cox, A.P. and Butler, S.F.J.
870	27 181	Procedure for the determination of cascade characteristics. (November, 1964)	Stoddart, J.A.P. and Gardner, D.
871	27 084	Measurements of pressure distribution and shock-wave shape on power-law bodies at a Mach number of 6.85. (April, 1965.)	Peckham, D.H.
872	27 209	Viscosity effects on the two-dimensional flow in cascades. (October, 1965)	Gostelow, J.P., Lewkowicz, A.K. and Shaalan, M.R.A.
873	27 281	A review of information on the frequency of gusts at low altitude. (July, 1965)	Bullen, N.I.
874	27 227	Analysis of hinge moment data for rectangular and near rectangular trailing edge controls at supersonic and transonic speeds. (May, 1965)	Isaacs, D.
875	27 302	A note on the turbulent uniform-property hydrodynamic boundary layer on a smooth impermeable wall; comparisons of theory with experiment. (August, 1965)	Escudier, M.P. and Spalding, D.B.
876	27 413	Characteristics of high-speed wind tunnels in the United Kingdom relevant to aeroelastic-model tests. (July, 1965)	Irwin, C.A.K.
877	27 375	The flapping behaviour of a helicopter rotor at high tip-speed ratios. (April, 1965)	Wilde, E., Bramwell, A.R.S. and Summerscales, R.
878	27 417	Comparison of helicopter and aeroplane vertical accelerations in turbulence. (August, 1965)	Webber, D.A.

C.P. No.	Council No.	Title	Author(s)
879	27 221	On the interaction of the transmitted shock with the boundary layer in a shock tube using Argon as a test gas. (September, 1965)	Davies, L. and Bridgman, K.
880	27 110	The interaction of the reflected shock with the boundary layer in a shock tube and its influence on the duration of hot flow in the reflected-shock tunnel Part I. (July, 1965)	Davies, L.
881	27 210	The interaction of the reflected shock with the boundary layer in a shock tube and its influence on the duration of hot flow in the reflected-shock tunnel. Part II. (September, 1965)	Davis, L.
882	26 972	Bulk compressibility effects in the R.A.R.D.E. No. 3 hypersonic gun tunnel. (May, 1965)	Clayden, W.A.
883	26 631	A study on the running times in reflected shock tunnels. (January, 1965)	Ackroyd, J.A.D.
884	27 183	An experimental investigation of the flow through inclined circular tubes at a Mach number of 4.0. (May, 1965)	Roe, P.L.
885	27 287	A velocity defect relationship for the outer part of equilibrium and near-equilibrium turbulent boundary layers. (October, 1965)	McQuaid, J.
886	26 553	Plasma flow in an electromagnetic shock tube and in a compression shock tube. (April, 1965)	Wilson, J.L., Schofield, D. and Regan, J.D.
887	27 123	A developed theory of spoilers on aerofoils. (July, 1965)	Barnes, C.S.

C.P. No.	Council No.	Title	Author(s)
888	24 048	Aerodynamic study - force and moment measurements on three delta wings of aspect ratios 0.83, 1.03 and 1.24 in combination with bodies of fineness ratio 13 at a Mach number of 4. (April, 1962)	Andrews, D.R.
889	26 850	Some exploratory tests on a two-dimensional blown cylinder model in the R.A.E. 2 ft x 1½ ft transonic-wind tunnel. (December, 1964)	Jones, A.F. and Buckingham, W.R.
890	25 545	The use of air injection to prevent separation of the turbulent boundary layer in supersonic flow. (November, 1963)	Peake, D.J.
891	26 491	The performance of a conical convergent-divergent nozzle with area ratio 2.9 in external flow. (November, 1963)	Golesworthy, G.T. and Herbert, M.V.
892	26 228	An experimental investigation of the influence of base bleed on the case drag of various propelling nozzle configurations. (February, 1964)	Roberts, J.B. and Golesworthy, G.T.
893	26 494	The performance of conical convergent-divergent nozzles of area ratio 2.44 and 2.14 in external flow. (February, 1964)	Golesworthy, G.T., Roberts, J.B. and Overy, C.
894	25 992	The performance of a centre body propelling nozzle with a parallel shroud in external flow. (April, 1964)	Herbert, M.V., Golesworthy, G.T. and Herd, R.J.
895	26 603	Notes on ducted fan design. (August, 1964)	Turner, R.C.
896	27 350	Crack propagation in fatigue Some experiments with DTD 5070A aluminium alloy sheet. (October, 1964)	Rooke, D.P., Gunn, N.J.F., Ballett, J.T. and Bradshaw, F.J.

C.P. No.	Council No.	Title	Author(s)
897	26 719	The effect of external flow on an internal-expansion propelling nozzle incorporating ventilation by ambient air. (November, 1964)	Herbert, M.V., Overy, C., Pinker, R.A. and Golesworthy, G.T.
898	26 996	Measurements of the rolling response of a fighter aeroplane (Hunter Mk 6) to turbulent air and a comparison with theory. (February, 1966)	Burnham, J.
899	26 743	The spectral energy balance in a turbulent mixing layer. (March, 1965)	Bradshaw, P. and Ferriss, D.H.
900		List of Current Papers published for the Aeronautical Research Council. (Nos. 851-900).
